**For Immediate Release**

**Carswell Protects 150 Year-Old Business with VAULT400 BaaS**

**INDEPENDENCE, Ohio** (June 25, 2014)—United Computer Group, Inc. (UCG), an information technology services firm, is pleased to have been chosen to deliver the mission-critical System i cloud backup for Carswell, Canada’s leading source of intelligent information solutions for legal, tax, finance and human resource professionals.

Due to the nature of their business, Fred Neeser, Technical Lead, and Margaret Banks, Manager Business Information Systems, thoroughly investigated their options when choosing an online data backup provider for their IBM i system. They needed to ensure their data was safely backed up in the cloud with the BaaS package they selected, and that the provider’s data centers were secure. Other key requirements include a yearly Auditors Letter for SSAE 16 SOC II Type II and full compliance with HIPAA/ HITECH regulations.

UCG met or exceeded all of Carswell’s key requirements to protect their IBM i 9406-810 system with their VAULT400 BaaS solution. VAULT400 provides daily automated backups to the cloud, provides secure transmissions and an easy-to-use interface to retrieve files, folders, or libraries for quick restores. Encrypted data is sent nightly to two data centers in Cleveland and Atlanta.

**About United Computer Group, Inc. and VAULT400**

[ucgrp.com](http://ucgrp.com) • [vault400.com](http://vault400.com)

UCG provides cost-effective technology solutions including VAULT400 BaaS and IBM Power Systems, in addition to a wide range of related products and services, all customized to fit the needs of their clients’ current needs and future growth. Founded in 1987, UCG is an IBM Advanced Business Partner specializing in mid-market and enterprise clients. UCG has been rated in the top 1% of IBM Business Partners nationwide.

UCG’s VAULT400 is a premier managed risk mitigation and business continuity planning service for secure online backup and disaster recovery. VAULT400 backs up an entire organization’s business-critical data to UCG’s secure data centers. Safe and off-site, the encrypted data is available online at all times for immediate, user-initiated recovery. VAULT400 works seamlessly within an organization’s existing infrastructure with no additional hardware required.
