For Immediate Release

UCG's VAULT400 BaaS a Natural Choice for R.W. Sidley, Inc.

INDEPENDENCE, Ohio (November 25, 2014)—United Computer Group, Inc. (UCG), an information technology services firm, is pleased to announce that R.W. Sidley of Painesville, Ohio has selected VAULT400 BaaS as its backup solution. R.W. Sidley has been a valued client of United Computer Group for over 20 years.

Brad Buescher, Human Resource Director, had taken on more responsibility in R.W. Sidley's IT department. He immediately recognized the need to improve their primary system up time and security, and contacted UCG. R.W. Sidley runs on the IBM Power 5+ system also provided by UCG.

UCG updated their Uninterruptable Power Supply in addition to adding VAULT400 BaaS. R.W. Sidley's data is now encrypted, compressed, and sent offsite nightly to two secure HIPAA compliant data centers located in Cleveland, Ohio and Atlanta, Georgia.

"VAULT400 is working great," stated Buescher. "United Computer Group worked with our IT staff to setup the system and make sure we understand how it operates. R.W. Sidley chose UCG's VAULT400 BaaS because the company has provided dependable IT support to our organization for over two decades. We trust UCG to support and secure our business critical data."

In addition, R. W. Sidley will enjoy Hardware Disaster Recovery at no charge for 30 days. In the event of a disaster, UCG will provide a like system loaded with their data within 48 hours. (12 and 24 Hour RTO options are also available.) R.W. Sidley then has the option to purchase the like system or order a new one from UCG.

A key success factor for this 81 year old business is their core belief in continuous improvement and investment in state of the art technology, art batching, manufacturing and recycling equipment. The historic Casement House, built in 1870 in Painesville, Ohio, serves as R. W. Sidley's Corporate Office.

Technology customized to your business today and in the future.

UCG's VAULT400 BaaS is a premier managed risk mitigation and business continuity planning service for secure online backup and disaster recovery. VAULT400 backs up an entire organization's business-critical data to UCG's secure data centers. Safe and off-site, the encrypted data is available online at all times for immediate, user-initiated recovery. VAULT400 works seamlessly within an organization's existing infrastructure with no additional hardware required.

About R. W. Sidley, Inc.

rwsidley.com

R.W. Sidley, Inc. was established in 1933 as a mining and manufacturing company. Since then they have continued to build their company through the development of high quality products derived from our original core products of silica sand and bank gravel. As a full service supplier R.W. Sidley, Inc. provides a broad range of construction solutions for today's building industry. They manufacture and supply bulk aggregates, industrial minerals, ready-mix concrete, masonry block products, structural and architectural precast components, and building supplies.
