

IBM i Solution Edition for UCG's VAULT400 Cloud Backup & DRaaS protects critical data for mid-market firms.

Highlights:

- Select a platform that delivers the lowest cost of acquisition through specialty pricing and lowest total cost of ownership through reduced maintenance and ongoing support costs
- Leverage a platform that utilizes the full power of the IBM i, with industry-leading scalability, performance and energy efficiency
- Benefit from superior service and support with highly coordinated service teams
- Experience fast deployment, rapid recovery, ease of use and cost savings
- Deploy a complete cloud backup and disaster recovery solution that delivers rapid ROI

Cloud backup and disaster recovery delivers fast deployment, rapid recovery, ease of use, and cost savings

Overview

What is my desired RTO and RPO? What are my business issues and pains as they relate to my current data protection and disaster recovery plan? How long can my business function without access to data and systems?

These are just a few of the challenging questions facing businesses today.

To protect against natural disasters or other catastrophic events, most companies rely on tape-based backup or high availability. Companies looking to manage this challenging issue find cost effective solutions with UCG's VAULT400 Cloud Backup & DRaaS.

UCG Technologies (formerly United Computer Group, Inc.) and IBM deliver business continuity for the mid-market

VAULT400 Cloud Backup & DRaaS solutions protect your organization's critical data.

UCG specializes in IBM Power Systems (IBM i) and protects all platforms from 10GB to in excess of 100TB. Options include cloud backup to two remote data centers, hybrid cloud, or private cloud.

Recent studies have shown a single downtime event could cost your organization between \$11K and \$25K per hour or \$600K per day. The most common reasons for data loss are human error, data corruption, power failure, natural disasters and theft.

IBM i Solution Edition for VAULT400 Cloud Backup & DRaaS offers fast deployment, rapid recovery, ease of use and cost savings.

The IBM i Solution Edition is available as an offering when a client selects both new hardware and software or services from UCG Technologies.

“By selecting the IBM i Solution Edition for UCG’s VAULT400 Cloud Backup & DRaaS, organizations gain significant IBM i pricing benefits, and an easy-to-manage cloud backup and disaster recovery solution that deliver a low total cost of ownership.”

— Michael Powall, Vice President, UCG

“As an IBM Business Partner, UCG has worked with IBM for three decades to ensure tight integration of our solutions,” says Jim Kandrak, President of UCG. “That collaboration has extended to UCG’s participation in the IBM Advisory Council and includes product design/development to testing and go-to-market strategies.”

The IBM i Solution Edition for UCG’s VAULT400 Cloud Backup & DRaaS is available for both the IBM Power System S914 and S924 line of servers. Both Power Systems feature the latest IBM processors, which represent a true leap forward to more intelligent systems that reduce complexity, decrease energy consumption, minimize downtime and drive down operational costs.

Benefits

	POWER8 S914 4-core	POWER8 S914 6-core
Edition feature codes	4928	4927
Processor cores shipped	4	6
No-charge IBM i processor core entitlements	0	0
Minimum IBM i processor core entitlements required	1	1
Discounted IBM i single user entitlements	Defaulted minimum = 5	Defaulted minimum = 30
No-charge i access unlimited user entitlements	Defaulted unlimited users	Defaulted unlimited users
Discounted Rational Development Studio	1	3
Discounted Rational Developer for i	1	3
No-charge service vouchers	Qty/duration = 1/4 hrs	Qty/duration = 1/8 hrs

IBM Power System S914

The Bottom Line

Together, IBM and UCG Technologies provide solutions that combine the power of IBM Power Systems™ and IBM i with the strengths of business applications, along with superior services and support. You can benefit from:

- Increased insight for more assured decision making
- Improved productivity, efficiency and responsiveness
- Reduced costs through increased flexibility
- Adaptability to business change
- Higher productivity
- Competitive Total Cost of Acquisition (TCA) and proven Total Cost of Ownership (TCO)
