IntellaFLASH™

FPSG is the only hosting provider that offers IntellaFLASH™. IntellaFLASH was created by FPSG and is an exclusive FPSG solution that provides the following:

- No User downtime for Production backups

- Supports BRMS and Tivoli Storage Manager

- Provides near Continuous Data Protection (CDP)

- Create point-in-time copies of your entire environment within minutes

- Easy and quickly repeatable

- Processes are tied into Job Schedulers

- No user downtime for planned outages

- No disruption to the send and receive process production, and DR stays in sync during the Switch test!

- Supports heterogeneous environments

- Create Test/Development environments on the fly
  – Simplify operating system/application upgrade testing efforts
  – Improve quality assurance testing
